## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15 and 24-27, drawn to an enclosure, classified in class 224, subclass 426.
  - II. Claims 16-23, drawn to a method of using an enclosure, classified in class 280, subclass 288.4.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed could be used in a materially different process of use. For example, the enclosure of claims 1-15 and 24-27 could be used to hold a spare tire for an automobile as opposed to claims 16-23 which require the step of enclosing the front wheel of a bicycle within the enclosure. Also, the enclosure could be used by securing the enclosure to the cargo area of a van at one location or to the wall of a garage at one location as opposed to claims 16-23 which require the step of securing the enclosure to a bicycle at two or more locations.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

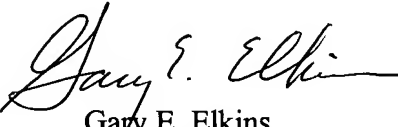

Art Unit: 3727

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
